Choosing strong passwords

Strong passwords

Strong passwords have:

- numbers, letters and special characters
- at least 8 characters
- both upper and lower case letters.

☐☐☐

A good password is also easy to remember.

Weak passwords

Weak passwords have:

- personal information
- no numbers or special characters
- only upper or lower case letters.

☐☐☐

Practise making your own passwords here.

Remember: Do **not** share your passwords with others!
