E-Safety Update 12

CORNWALL
LEARNING

Welcome to the Easter edition of
Cornwall Learning's e-Safety update

Teachers

The DfE's draft statutory guidance for September 2016 'Keeping children safe in education' is currently available and includes reference to Online Safety:

Online safety

75. As schools and colleges increasingly work online it is essential that children are safeguarded from potentially harmful and inappropriate online material. As such governing bodies and proprietors should **ensure appropriate filters and appropriate monitoring systems are in place**. Children should not be able to access harmful or inappropriate material from the school or colleges IT system. Governing bodies and proprietors should be confident that systems are in place that will identify children accessing or trying to access harmful and inappropriate content online.

76. As part of their safeguarding and or child protection policy governing bodies and proprietors should have in place **a clear policy on the use of mobile technology in the school**.

Does your school have in place a clear policy on the use of mobile technologies?

Review the SWGfL's policy template for Mobile Technologies (2016):

Updated Advice to schools (Jan 2016)

In September 2015 the National Police Chief Council released a statement on the procedure they have to take when a 'sexting' incident is reported to the police. As a result the UK Safer Internet Centre and SWGfL have updated their advice for schools on responding to and managing sexting incidents into two infographics:

<http://www.saferinternet.org.uk/news/responding-to-and-managing-sexting-incidents-updated-advice-for-schools>

Does your school have appropriate filters and appropriate monitoring systems in place?

The National Education Network

(NEN) has produced new Guidance Notes for schools and academies on the NEN website:

Managed monitoring & reporting solutions: how these solutions can help schools meet increasingly complex online safeguarding and security challenges.

The document can be downloaded in PDF format, as well as to read on the website.

Childnet International has produced an information guide for teachers and professionals working with children and technology.

Childnet
International

Technology is a huge part of personal and professional lives and there are safety issues that need to be considered. The checklist has been designed to ensure that teachers and professionals are ready to face these challenges whether at school or at home, in the classroom, or in the wider school community.

E-Safety Update 12

Parents

Ofcom publishes ten-year anniversary edition of its latest research on how children and young people aged 3-15 use and think about media and the internet:

Every year Ofcom asks lots of children across the UK about the devices they have and what they use them for. Ofcom splits the results into four age groups: 3-4 year olds; 5-7 year olds; 8-11 year olds and 12-15 year olds for example.

Children and parents: media use and attitudes report

Figure 7: Availability of key platforms in the home, by age: 2007, 2010, 2012, 2014 and 2015

QPSD/E/H/I – I'm going to read out a list of different types of media devices that you may or may not have in your home, and which your child may or may not use (prompted responses, single-coded)
Base: Parents of children aged 3-4 (688 in 2015) or 5-15 (1379 aged 5-15, 399 aged 5-7, 492 aged 8-11, 488 aged 12-15 in 2015) - significance testing shows any change between 2014 and 2015.

The report is published every year and results are compared to previous year's results to identify what has changed.

The Breck Foundation has been set up in the memory of Breck Bednar (a 14 year old from Caterham, Surrey who loved technology and online gaming) to help other young people to enjoy playing online but to be aware of some simple rules to stay safe. Remembering that the friends you make online are not like your real friends. "Play Virtual/Live Real".

- **Beware**—Opening files, accepting emails, IM messages, pictures or texts from people you don't know or trust can lead to problems - they may contain viruses or nasty messages
- **Report**—Tell your parent, or trusted adult if someone or something makes you feel uncomfortable or worried, or if you or someone you know is being bullied
- **Educate**—Someone online might lie about who they are and information on the internet may not be true. Always check information with other websites, books or someone who knows. If you like chatting online it's best to only chat to your real friends and family
- **Communicate**—Meeting someone you have only been in contact with online can be dangerous. Only do so with your parents or carers permission and even then only when they can be present. Remember online friends are still strangers even if you have been talking to them for a long time
- **Keep Safe**—Keep safe by being careful not to give your personal information when you are chatting or posting online. Personal information includes your email address, phone number, password, location

Tragically Breck was murdered on February 17th 2014 by someone he met online.
