INTRODUCTION / AIMS <p>Our EYFS Curriculum has been designed to reflect the nature of our school environment, the seasons of the year and the nature around our school. It aims to teach the children how their environment compares to other places, cultures and nature in other parts of the world. Each key text and linked provision are included in the curriculum for very specific reasons, and we want to ensure that all children leaving the Foundation Stage are ready to start the KS1 curriculum. Each learning focus does not last a specific amount of time but is based on the children's learning at the time, and so can run from anything between two and seven weeks. All of the overarching themes have resources and activities ready to use in the enhanced provision. Specific concepts are introduced with a good quality storybook or age appropriate non – fiction text. Using books in this way teaches children that books and reading form the basis of all learning.</p> <p>This ambitious Early Year's curriculum aims to teach all children the skills and knowledge in order that they reach the seventeen Early Learning Goals described in the Early Years Foundation Stage. We teach through a range of teaching methods including child-initiated learning, whole class teaching, group teaching, investigations and problem solving together, and independently. As many activities as possible are play-based; however, there is also a need for direct teacher-led activities to ensure children gain essential knowledge and skills from their teacher. All activities are expertly modelled, and children are given sufficient time, support and resources to repeat and practise them.</p> <p>Diversity: we have carefully planned our curriculum to include diversity (gender, disability, BAME – Black, Asian and Minority Ethnic) to ensure it is a diverse and inclusive curriculum. Where there are key links, these are highlighted below in orange.</p>

EYFS Long Term Overview 2021-22

- Understand the 'one more than/one less than' relationship between consecutive numbers.

Cardinality

- Be able to subitise numbers to five. Identify patterns of numbers within objects and pictures. Using opportunities of amounts in the environment outside and inside as well as maths resources including 10 frames, counters and rekenrek.
- Matching the numeral with a group of items to show how many there are (up to 10).
- Accurately counting out up to 10 objects from a larger group and counting objects, actions and sounds. Using one to one correspondence and saying the numbers in order and matching one number name to each item. Saying how many there are after counting – for example, "...6, 7, 8. There are 8 balls" – appreciating that the last number of the count indicates the total number of the group. This is the cardinal counting principle.

Composition

- Be aware that numbers are made up (composed) of smaller numbers, exploring partitioning in different ways with a wide range of objects.
- Conceptually able to subitise larger numbers by subitising smaller groups within the number, e.g. sees six raisins on a plate as three and three.
- In practical activities, adds one and subtracts one with numbers to 10. Beginning to be able to explore and work out mathematical problems, using signs and strategies of their own choice.
- Automatically recall (without reference to rhymes, counting or other aids) number bonds up to 5 (including subtraction facts) and some number bonds to 10, including double facts. Using opportunities that arise e.g. there are 5 of us, 3 of us have clipboards how many more do we need?

Numerical Patterns:

To recognise patterns in the counting system e.g. 10s and ones, and enjoying verbally counting to 20 and beyond.

Comparison

- Use number names and symbols when comparing numbers and showing interest in numbers.
- Understand the 'one more than/one less than' relationship between consecutive numbers.
- Use the vocabulary: 'more than', 'less than', 'fewer', 'the same as', 'equal to' when discussing amounts and numbers and when estimating a number of things, showing understanding of relative size.
- Use concrete objects to explore and represent patterns (numbers up to 10) including odd and even numbers, double facts and sharing.
